

General Practices in Tower Hamlets

[Back to results](#)

There is a federation of 36 General Practices in Tower Hamlets, which cares for more than 312,000 people.

They provide a range of community and primary care services to our local residents, various 'at scale services' for the practices as well as professional staff training.

They are a partner in Tower Hamlets Together, our local integrated care partnership that coordinates health and social care provision in the Borough to deliver person-centred care, wellbeing and self-help for our community.
